### The Challenge

- One campus with multiple buildings and more than 60 elevators
- Testing needed to be consolidated into one month
- A plan was needed to make the process less intrusive and more efficient
- Additional testing during off hours allowed Stanley to test everything necessary in a short time frame

### The Benefit

### The Solution

- Stanley Elevator, working closely with the Commonwealth of Massachusetts was able to align testing of all elevators into a single month.
- Aligning the state tests into one month reduces the impact on the hospital
- Saves time and money
- Utilizes the resources of all parties more effectively
