Our Philosophy

SnapCab's philosophy can be summed up easily: Paneling systems simplified. The SnapCab® system – from designing to ordering to installing – was created for ease, convenience, and superior results. Our emphasis on simplicity, value, and exceptional customer service is intertwined through every facet of our business.

Whether it's new construction, modernization, or a simple upgrade, SnapCab has interior models that fit your projects aesthetic, durability, and budgetary requirements. Our models are always personalized when you choose pattern and color, but can easily be modified if you mix and match materials from various models to create combinations unique to your project.

Each system includes wall panels, toe kicks, binders, reveals, and our comprehensive installation kit. SnapCab's patented interlocking panels are E84 fire tested, elevator code and LEED compliant.

With over 10,000 installations across the continent, a strong reputation for quality, craftsmanship, on time delivery, and commercial agreements with heavyweights like Corning Incorporated, SnapCab has become the undisputed leader in elevator interior systems. But we're not letting that slow us down; continuous innovation and improvement remains the foundation of our company.

CORNING Gorilla® Glass

SnapCab, in collaboration with Corning, is opening the door to beautiful, modular, progressive elevator and wall panel designs with thin, lightweight, damage-resistant panels. The SnapCab modular system allows architects to freely design unique interiors while making it simple to customize.

Lobby Walls

Corning® Gorilla® Glass offers a unique combination of toughness, elegance and design freedom for interior architecture. SnapCab, in collaboration with Corning, offers our award winning wall panel system for your lobby, conference room, or any interior space. Utilize the brilliance of Gorilla Glass to make a high-end statement in the most important areas of your building.

Gorilla Glass Over Metal

Corning® Gorilla® Glass can be laminated over conventional stainless steel to provide a thin, lightweight, protective covering. These stainless steel laminates incorporate the durability, scratch resistance and elegance of Gorilla Glass with the beauty of stainless steel.

Satin Stainless

Mirror Stainless

Satin Stainless
w/ Anti-Glare

Mirror Stainless

Active Displays

Designers will also have the option to introduce new technology such as active displays and interactive touch panels as they become more affordable thus future proofing their interiors.

Tough, yet Elegant

Find out why tough, thin Corning® Gorilla® Glass enables lightweight, durable solutions for elegant interior designs.

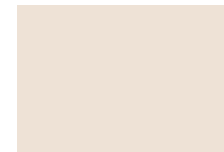

Innovation to Fuel Imagination

Corning® Gorilla® Glass is optically clear so your whites are pristine, your colors are vibrant, and images and logos pop! It's a material that allows architects to achieve their vision without compromise.

Gorilla Glass is a blank canvas that allows you to exercise your creativity: Specify any pantone color for an exact match. Provide your own high resolution imagery or logos. Choose from one of our patterns and personalize the magnification and colors. Choose from one of our wood or stone images, or specify your own.

Balancing Timeless Elegance and Modern Needs

Lightweight stone offers all of the functionality you need – fire rating, easy maintenance, durability, impact resistance – and all of the design freedom and continuity you desire. Whether you want to continue a lobby design in the elevator or create a cohesive union between cab and building, you can easily specify the look that will work for your project.

Elevators are one of the most frequently used features in any multistory building – and it often shows. Wear and tear ages a cab dramatically. This is where Rigidized® Metals really shine. The deeply textured three-dimensional metal offers an anti-aging remedy that ensures your design will stand the test of time. Beautifully.

Defying Time and Traffic with Superior Performance

Rigidized® Metals are up to 75% stronger than ordinary sheet metals. This allows you to specify a thinner, lighter gauge to meet weight requirements, as well as stay on budget and reduce environmental waste. The surfaces also resist dents and scratches and deter vandalism.

Rigidized® Metals are available in a variety of patterns ranging from rugged industrial to smooth contemporary. It's easy to specify the look you want – and ensure it still looks that way for years to come. Here is a sampling of the patterns and finishes Rigidized® has to offer.

Beautiful Solutions to Heavy Design Challenges.

Wood veneers offer beauty and flexibility, allowing you to achieve project objectives with ease. Hard-wearing finishes, available in both standard and custom, protect surfaces and maintain the beauty of your design. Additionally, large sequence runs and end-matching ensure that you can maintain continuity in the grain.

Wood veneers make it easy to specify species, cuts, and stains that align with your vision and match existing architectural millwork and doors. Here is a small sampling of what we have to offer.

Resilient

Why Solid Phenolic?

Wilsonart Compact Laminate is a highly durable, solid phenolic panel, that's perfect for high traffic lobbies and elevator cabs. Wilsonart Compact Laminate is vandal resistant, non-porous and non-microbial, which means it will not absorb any moisture or bacteria. Wilsonart Compact Laminate is ideal for hospitals, educational facilities, and any other application that requires extra durability. Utilize Wilsonart Compact on any of the Wilsonart Laminate models on pages 54 – 70.

Presentation Boards

SnapCab provides the ultimate tool for assuring your cab will be built exactly how you envision it. Our presentation boards, available for all projects without charge, include a 3D computer rendering of the cab and actual samples of the materials you have selected for your building.

Laser Engraved Panels

Enhance your Wilsonart Compact Laminate panels with laser engraved logos, two dimensional images, line art and anything else you can imagine. Wilsonart Compact Laminate provides a wonderful pallet for creative ideas to be put into action.

Solid Performance Through and Through

Wilsonart® Compact Laminate is available in more than 220 designs and is a durable solution that is perfect for high-impact surfaces such as lobbies and elevator cabs. Here are just a few to get you started.

Expand Your Design Horizons

You can opt to take your design to the next level: Premium. Here, the color and pattern options expand, as does product resistance to wear and damage. In some cases, HD (High-Definition) will fit the needs of the project with its extensive pattern selection and superior durability. Fortunately, this is a decision with no wrong answer. Wilsonart® Laminates make it easy to achieve your design goals. Below are just a few of the many patterns available.

Amber Cherry	Asian Sun	Biltmore Cherry	Black	Blackstar Granite
Blond Echo	Brazilwood	Brighton Walnut	Burnished Chestnut	Cosmic Strandz
Fonthill Pear	Ginseng Tea	Madagascar	Milano Amber	Milano Quartz
Monticello Maple	Pewter Brush	River Cherry	Sunstone	Tuscan Walnut
Urban Iron	Vapor Strandz	Versailles Anigre	White Juparana	Wild Cherry
Windsor Mahogany	Windswept	Windswept Bronze	Windswept Pewter	Zanzibar

Handrails & Bumpers

SnapCab pre-installed handrails and bumpers are mounted during the manufacturing process, making them the most secure in the industry. We offer eight different designs, in various sizes, that allow you to personalize your interior. Materials include stainless steel and bronze, finished in satin or mirror to complement the wall panel materials you have selected for your interior. Handrails and bumpers can be specified for the back and/or side walls.

SnapCab Installation: Done in a Day

1 Reveals

Available in satin stainless, satin bronze or black, reveals are the first part of the interior to install.

2 Toe Kicks

Toe kicks (layer 1) set the groundwork for the rest of the panels, and play a key role in ventilation. SnapCab installation starts at the bottom and works its way up.

3 Panel Binders

Any visible panel edges near doors are protected with angled panel binders to deflect any objects that may otherwise cause damage.

4 Interlocking Panels

The patented joints on SnapCab's panels change everything – and make the installation of each layer a snap. No clips needed!

5 Pre-Installed Handrails

All handrails and bumpers come pre-installed to save time – and money – on the install.

6 Top Cap

Our top cap allows for code required ventilation, and features an integrated pad hook channel, which eliminates the visual nuisance and added cost of pad buttons.

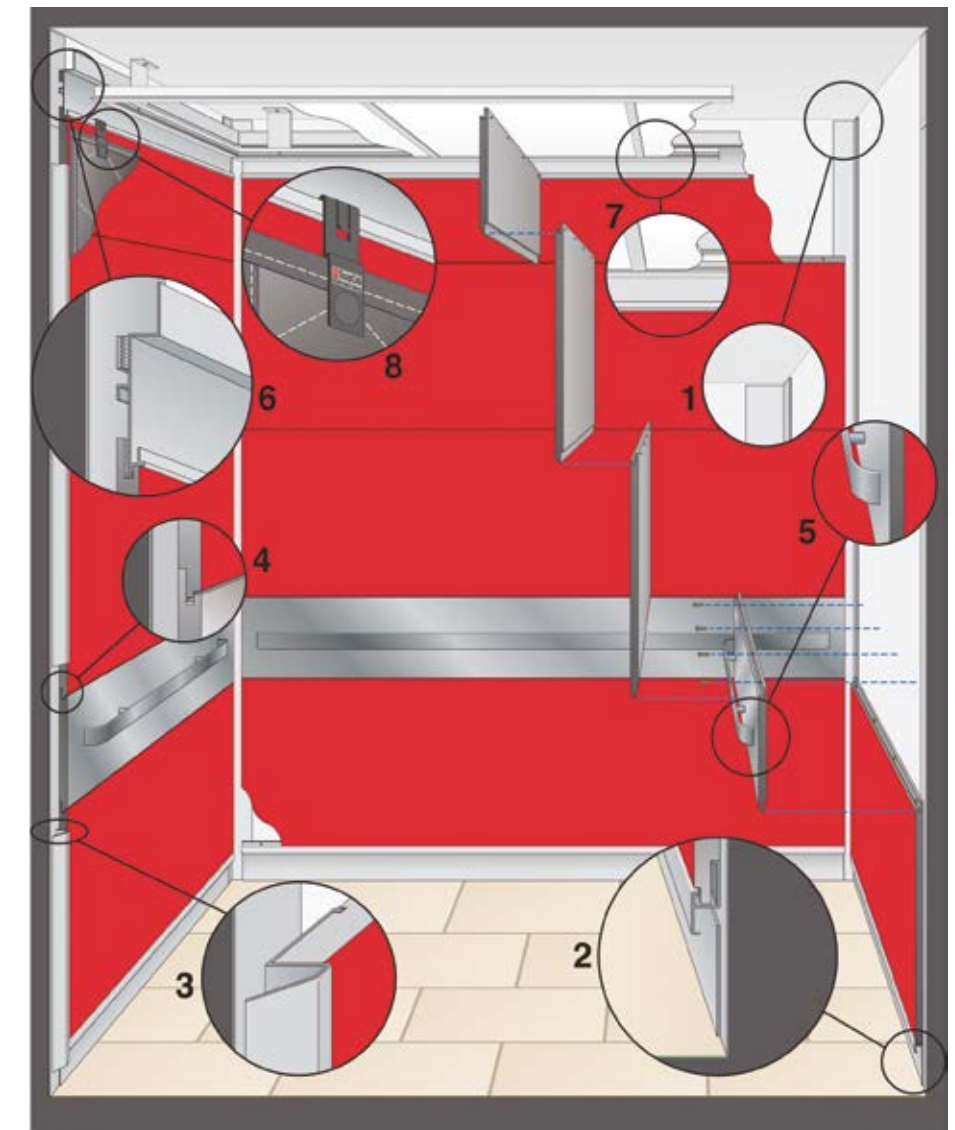

7 Economy Ceiling

This short video shows you how to install our Economy Ceiling quickly, easily, and safely. SnapCab offers six ceilings, with plenty of options.

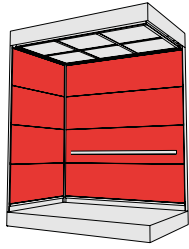

8 Protection Pads

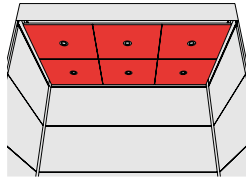

Our standard protection pads come with an integrated pad hook. Quickly hang and secure pads by placing the hooks in the top cap channel.
